SKILLS

Programming & Data Analysis:

- Python: Expertise in libraries such as pandas, NumPy, scikit-learn, Matplotlib, and Seaborn for data wrangling, statistical modeling, and predictive analytics.
- SQL: Proficient in writing complex queries in MySQL for data extraction, transformation, and ensuring data integrity.
- R: Proficient in R for statistical analysis and data visualization, including experience with packages like ggplot2.
- C: Proficient in C programming with strong fundamentals, having completed projects on data structures, algorithms, and basic systems programming.

Data Visualization & Reporting:

- Tools: Experience creating interactive dashboards and visualizations using Python and R-based visualization tools.

Database Management & Tools:

- Linux Terminal: Competent in using command-line tools for database management and scripting.
- Tools: Familiar with Jupyter and Git for coding, debugging, and version control.

Analytical & Technical Skills:

- Mathematical Foundations in Machine Learning: In-depth understanding of the mathematical principles underpinning machine learning, including linear algebra, calculus, probability theory, and optimization methods, which inform model development and performance interpretation.
- Theoretical Statistical Analysis: Strong grasp of mathematical statistics, encompassing probability distributions, inferential statistics, regression theory, and hypothesis testing, ensuring rigorous and robust data analysis.

Professional & Methodological Skills:

- Attention to Detail: Meticulous in ensuring data quality, report accuracy, and thorough documentation of processes.
-

PERSONAL PORTFOLIO WEBSITE

<https://perceptive-truth-production-c940.up.railway.app>

- Built and deployed a personal portfolio site using Django and Railway to showcase ML, Python, and C projects.
 - Implemented project models, dynamic views, and static/media file handling.
 - Styled with Bulma; configured WhiteNoise for production static file delivery.
-

EDUCATION

University of Central Florida Statistics B.S.

September 2024- (Expected) December 2026

Currently pursuing a Bachelor of Science in Statistics with 91 credits as of Spring 2025 at the University of Central Florida, where I'm developing a comprehensive skill set in advanced mathematics, programming, and statistical analysis. My academic focus integrates rigorous theoretical foundations with hands-on projects that emphasize data wrangling, statistical modeling, and predictive analytics. I've gained practical experience using Python libraries such as pandas, NumPy, and scikit-learn to clean, analyze, and visualize complex datasets. Additionally, my coursework involves writing SQL queries for data extraction and transformation, as well as utilizing data visualization tools to build interactive dashboards that highlight trends and insights.

Valencia College Associates in Arts

Established a solid foundation in general education and essential STEM disciplines. This achievement includes coursework in mathematics, sciences, and computer science, preparing me for advanced studies in data science and analytics.

May 2024

EXPERIENCE

Attraction Attendant - Universal Orlando Resorts

October 2023-Current

At Universal Orlando, I hone strong organizational and time management skills by effectively managing guest flow and coordinating with team members to ensure smooth operation. I balance multiple tasks efficiently, providing timely service without compromising quality, by adhering to schedules and operational guidelines. I contribute to a well-organized attraction experience.
